PROFILE INFO

Software developer with 3 years of experience building products for diverse businesses, ranging from startups to large enterprises. Proven ability to deliver high-quality solutions using a variety of technologies, specializing in TypeScript and React. Passionate about creating robust and scalable applications with a focus on maintainable and scalable solutions. Eager to contribute to challenging projects and continue expanding technical expertise in web development.

WORK EXPERIENCE

Grid Dynamics

Middle UI Software Engineer | SEP/2023 – PRESENT

- Developing user interfaces: Translating designs and wireframes into clean, efficient, and interactive user interfaces using React and TS.
- Collaborating with cross-functional teams: Working closely with designers, product managers, and back-end developers to deliver high-quality software solutions that meet project requirements and deadlines.
- Actively participated in and facilitated agile development processes: Engaging in backlog refinement, sprint planning, and demos to contribute to efficient and iterative software development.
- Maintaining and troubleshooting: Proactively monitoring application performance, identifying and resolving issues, and providing support.
- Performed code reviews: Providing constructive feedback to enhance software quality, maintainability, and knowledge sharing within the team.

Course Si

Programming and robotics teacher | Jan/2023 – Aug/2023

- Delivered engaging lectures and hands-on workshops on programming fundamentals and robotics to diverse student groups.
- Provided individualized instruction and mentorship through pair programming sessions, fostering collaborative learning and problem-solving skills.
- Conducted code reviews to provide constructive feedback and guide students in developing high-quality, efficient code.

EDUCATION & CERTIFICATES

- **WROCLAW UNIVERSITY OF SCIENCE AND TECHNOLOGY** - Electronic and Computer Engineering | 2022-2025
- **GOOGLE CLOUD CERTIFIED - CLOUD DIGITAL LEADER** | 2024
- **CCNA: INTRODUCTION TO NETWORKS**

SKILLS

Programming languages & Technologies

JavaScript, TypeScript, CSS, Node.js, GraphQL, Rest

Libraries

React, Redux, Zustand, Express, SCSS, MUI

Version control system

Git, GitLab, BitBucket, GitHub

Databases

MongoDB, Postgresql

Issue Tracking

Jira

Testing

Jest, Vitest

Cloud

GCP

Design

Figma, Photoshop
